

➤ UK Familiarisation:

This course is designed for drivers who are new to the UK road system.

Given the diverse range of road systems around the world, the training is tailored to the precise requirements of the driver.

The course gives an overview of the law requirements for drivers, Speed limits, various types of roads and much more.

If required, can be expanded to assist a driver to attain a UK driving licence by taking them through the requirements of the UK Driving Test.

➤ Speed Recognition:

This course is designed for those drivers having six or more penalty points on their driving licence for excess speed offences who are at risk of losing their licence through 'totting up' or upon conviction at court for speeding.

It tackles the likely causes of excess speed by raising a driver's awareness of the associated dangers and how to prevent inappropriate use of speed.

Drivers are far more likely to conform if they understand the reasoning behind speed limits and how to distinguish between the limits imposed on various roads.

➤ Post Collision Review:

This Post-Collision Review course is designed to support any internal investigation following a serious collision involving extensive damage, vehicle write-off or personal injury resulting in lost days of business.

This training not only fits in with an organisation's Health & Safety policy regarding the investigation of an employee injury accident whilst at work, but it is also beneficial to develop a driver's confidence and to address any driving faults which may have contributed to the collision.

➤ Eco Driving:

This course provides specific on-road driver training to help improve fuel efficiency and reduce CO2 emissions. Using techniques that are endorsed by the Driving Standards Agency (DSA), Energy Savers Trust.

This training will assist you in reducing your company's overall fuel bill. You could make fuel savings of around 10% if these driving techniques are fully adopted.

➤ Defensive / Development Driver Training:

We offer advanced and defensive driving courses for companies that want to lower the road risk of their company car and van drivers. Our courses are bespoke to the needs and requirements of businesses of all sizes and sectors.

Our specialist private driving courses are designed for individuals that wish take their driving to a higher level with one-to-one training.

We have a range of advanced and defensive driving courses. We understand every driver is unique, and so an individual approach is what makes us different.

This understanding is a key element, which separates us from other driver training providers. We listen and understand you and your needs.

Our customers are very diverse, and range from owners of sports cars who want to learn more performance based techniques, to drivers who may have lost their confidence following a road traffic collision – or have a driving phobia.

We also help newly qualified drivers, or their parents, who anxiously want their child to learn vital additional skills, such as driving on motorways etc.

Drivers who may require a refresher or to up- date skills and driving procedures.
